

APPENDIX

In the Specification:

Please amend the substitute specification, the first full paragraph of page 9, lines 13-16, as follows:

[The present application includes at least one drawing and/or photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Patent and Trademark Office upon request and payment of the necessary fee.] Further objects and advantages of the invention will become apparent from the following description and claims, and from the accompanying drawings, wherein:

In the Claims:

Please amend Claims 39, 41 and 72 as follows:

39. (three times amended) A tape constructed and arranged for sealing to a web, said tape comprising [a lip, said lip having a U-shaped fold forming a closed end of said lip, an opposite wall

connected to said lip opposite said fold and a flange connected to said opposite wall,] a first wall, a second wall and a U-shaped loop formed between and joining said first wall to said second wall, said [tape] first wall including a flange section and further having a reclosable fastener portion connected thereto [at an end of said lip thereof] matable to a mating fastener connected to said [opposite] second wall, said mating fastener having said flange juxtaposed thereto and being substantially parallel to an end of said flange, said tape having an inside surface thereof treated so as to be non-sealable and an outer surface treated so as to be sealable to said web.

41. (three times amended) The tape of Claim 39 in which said [lip, opposite] first wall, said second wall and said flange comprise a continuous piece of plastic material.

72. (three times amended) A reclosable tape for bags comprising, a reclosable interlocked fastener connected to a tape, said tape having [a U-shaped fold forming a closed end of said tape, said reclosable interlocked fastener being connected to an open end of said tape, said open end opposite said fold]

a first wall, a second wall and a U-shaped loop formed between
and joining said first wall to said second wall, said first wall
including a flange section; said tape having a non-sealable
inside surface within said fold, so as to prevent sealing of
said inside surface to said bags.
